Ограничения целостности в SQL

```
USE testdb;
IF OBJECT ID ('dbo.Orders', 'U') IS NOT NULL
 DROP TABLE dbo.Orders;
CREATE TABLE dbo.Orders
 orderid INT CONSTRAINT PK ORDERS PRIMARY KEY,
 empid INT NOT NULL,
 custid VARCHAR (10) NOT NULL,
 orderts DATETIME NOT NULL,
 qty INT
                     NOT NULL,
 CONSTRAINT FK Orders Emp FOREIGN KEY (empid)
 REFERENCES dbo.Employees(empid)
                                             43
```

Внешние ключи в SQL Server Management Studio

Ограничения целостности в SQL

```
ALTER TABLE dbo.Employees

ADD CONSTRAINT FK_Emp_Emp

FOREIGN KEY (mgrid)

REFERENCES dbo.Employees (empid);
```
